A land bird, the species of which none of the people on board could designate, followed the ship for almost half the journey from the other side. It was a mystery how it rested, as it would seem necessary for so small a bird to to do, and it is conjectured that the little bird perched at times on the back of one of the gulls that were constant attendants of the ship from the time that she left the other side until Sandy Hook was reached.

A great transformation takes place in the body within ten days or two weeks after coffee is left off and Postum used, for the reason that the poison to the nerves—caffeine—has been discontinued and in its place is taken a liquid food that contains the most powerful elements of nourishment.
